Bifocal ___ Trifocal ___ Progressive Lens ___
2. How do you *feel* about wearing glasses? _____
If it were possible to go without glasses for most of the time, would you like that? ___ No ___ Yes
3. Do you drive at night? ___ No If Yes: ___ Occasionally ___ Nightly ___ As profession(truck,cab)
4. Please circle some of the activities you do on a regular basis:

Read newspaper,books	Hunt or fish	Needlepoint/Sew	Golf
Musician	Paint/Artist	Cook	Computer
Spectator sports	Paperwork	Watch TV	Cell phone
5. If you **had** to wear glasses after surgery, for which activity would you be **most** willing to use glasses?
 Reading fine print Menus/Computer Driving

As we grow older, the eye's natural lens can stiffen, harden and begin losing its clarity, forming a cataract. To improve your vision, this cloudy lens must be removed and replaced with an artificial Intra Ocular Lens (IOL). The Williamson Eye Center now has options available to you with the latest technology in refractive lens replacement at the time of cataract removal surgery. Please ask your surgeon if you are a candidate for one of these refractive lenses. This technology may help eliminate your need for glasses at distance as well as near.
