**FOR IMMEDIATE RELEASE**

**Video by Dr. Blake Williamson selected in Top 10 Ophthalmic Surgical Videos in the Nation**

**Baton Rouge, LA (January 3, 2019)** – The prestigious *Cataract and Refractive Surgery Today* magazine recognized local Baton Rouge eye surgeon, Dr. Blake Williamson, of Williamson Eye Center for presenting one of the top 10 surgical videos in the nation featured on Eyetube in 2018.

Eyetube is ophthalmology’s leading source for high-quality, full-narrated ophthalmic surgical videos. The Web site was created by a panel of experts to better educate ophthalmologists through the online archiving and sharing of videos.

Dr. Williamson’s video entitled, *iStent Inject with Laser Cataract Surgery and ORA-Guided Toric IOL Implantation*, will be used by ophthalmologists and industry members across the world to provide more advanced care to patients with Glaucoma and Cataracts. “Microinvasive glaucoma surgery pairs well with advanced refractive cataract surgery,” Dr. Williamson explains, “because both procedures have a positive impact on lifestyle via spectacle independence and a reduction in medication burden.”

“It is a great honor to be included in this list among many of the leaders in ophthalmology. Our goal in sharing our expertise is always to provide better care for patients,” said Dr. Blake Williamson.

Dr. Williamson practices comprehensive ophthalmology, specializing in state of the art cataract and refractive surgery, as well as glaucoma care with specialty in micro-invasive glaucoma surgery (MIGS).

“I am very proud of the accomplishments that Dr. Blake Williamson has achieved in his career, especially that he has become known as an industry thought leader and is carrying on the legacy of our practice in advancing the field of ophthalmology to provide the best possible care for patients around the world,” says Dr. Charles Williamson, Medical Director and CEO.

The article and video may be found on *Cataract and Refractive Surgery Today* online at:
